Latin America – California Specialty Crops  
Project 17-0275-007-SC  
Stakeholder Summary

Economic growth in Mexico, and increasing income/interest in new food products, provides a key opportunity for California specialty crops in a competitive market. Mexico has changed significantly as their living standards rise. Consumers are exposed to greater diversity of choice both locally and in travel abroad. Trade keeps the U.S. economy open and competitive; helping to ensure that California continues as a prime supplier of quality products.

This project's export trade opportunities provide participating specialty crop companies with increased sales by expansion into foreign markets. The project's unique market promotion of California specialty crops leads to increased consumer awareness and market share by leveraging the California Grown identity.

Latin America Dried Fruit & Nut Inbound Trade Mission to California: September 2019
- 8 qualified importers from Costa Rica, Panama, Colombia and Mexico
- 30 California dried fruit & nut suppliers participated in business-to-business meetings
